TACTICAL MOBILE AERIAL DIP SOURCE

HeloPod® is the ultimate Tactical Advantage

The HeloPod® is a self-contained tactical module that is transported intact to create a dip site where none currently exists. A single person can set up, operate, and break it down.

MULTI-PLATFORM MOVES

- Tilt bed Trailer
- Hook Truck
- Flat-Bed Tow-Truck
- Roll-off Truck
- Heavy-lift helicopter via D-rings

UNSURPASSED DURABILITY

- 10-gauge steel construction for long service life
- No vinyl liners to rip, leak, or replace
- Transport intact – no assembly required
- Supports fill rates up to 3,000 gpm
- As a cistern – three engines draft & fill simultaneously

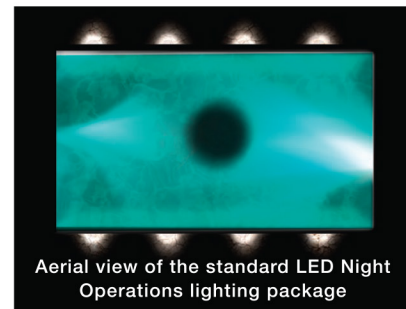

STANDARD FEATURES

- Connects to any hydrant or water supply
- Automatic fill valve/float system allows filling/re-filling unattended
- Supports all helicopter sizes – VLHT, FireHawks, Types 1, 2 & 3
- All HeloPod® models support snorkel fill and Bambi Bucket Ops*
- HeloPod® capacity: 3,775 gallons; with maximum transport weight: 9,999 lbs
- LED Night Ops lighting package – marine battery with solar charger
- Inside built-in cabinet protects fill valve and provides storage
- Exclusive snag-free Air-Gap with integrated spillway

UPGRADE OPTIONS

- Remote activation system – for fill, refill, and lighting via cellular or satellite
- Welded A-Frame for hook-truck transport
- Welded D-rings for aerial transport
- Remote-site pump kit – (2) 3" pumps, fill/transfer hoses, and support gear
- Invasive Species package – intercepts AIS prior to loading; eliminates decon of tanks, pumps, and hoses; stops the spread of AIS
